PROFILE

Frontend Developer with over five years building e-commerce interfaces for leading retail brands across Latin America, within a twelve-year career in digital design.

I work with the client from the definition stage: I translate their requirements into an interface in Figma and take it to code myself, covering the full cycle with no handoff between design and development.

Adobe Certified Expert — Adobe Commerce Front End Developer.

SKILLS

Frontend	HTML5, CSS3, LESS, JavaScript, responsive design, component architecture, performance optimization, cross-browser and cross-device compatibility
E-commerce	Magento 2 / Adobe Commerce, theming systems and overrides, layout XML, phtml templates, PageBuilder, Adobe Commerce Cloud
Design	Figma, UI/UX, design systems and UI kits, style guides, visual identity, Photoshop, Illustrator, 3D modelling
Tools	Git, GitLab, Jira, Grunt, Chrome DevTools, Lighthouse, Claude Code (custom agents and skills)
Languages	Spanish native · English B2, upper intermediate: conversation, technical documentation and written communication

EXPERIENCE

Improntus

Jul 2021 – Aug 2026 · 5 years

Frontend Developer

Multinational e-commerce development agency.

- Created the **agency's own base theme**: a replacement for Magento's default theme (Luma), built to cut markup time across the entire frontend team. I simplified the variable system, brought in Grunt webfonts to generate and maintain custom icon typefaces, and fixed native platform bugs the team had been working around project by project.
- Led that project with a team of three frontend developers**: I defined the scope, created and distributed the tasks across sprints in Jira, walked each member through the goals and reviewed deliverables, while taking on markup work on the same build in parallel.
- Coordinated the frontend audits** the sales team used to back its proposals: I defined the scope — performance, responsive, accessibility and code quality —, distributed them across the team, reviewed and edited every deliverable and escalated them to management. **42** were completed: 18 for prospects and 24 for the existing client base.
- Brought AI into the daily workflow with **Claude Code**, building custom agents and skills to speed up implementing designs from Figma, code audits and technical documentation.
- Built the frontend of **more than 20 e-commerce stores** for leading retail brands in Argentina, Brazil, Chile, Peru, Mexico and Colombia — Kosiuko, Bensimon, Vitamina, Uma, Sole and Granado, among others —: home, landing pages, product listings and detail pages, minicart, cart, checkout and navigation, across desktop, mobile and every intermediate breakpoint.
- Worked across Magento's theming architecture — phtml templates, layout XML and LESS styles — and integrated and customized in-house and third-party modules: checkout, shipping methods, product

recommenders and page builders, among others., and developed custom modules for the admin panel so the client could edit site content without depending on the development team.

- For **New Balance Chile** — the brand's official store in the country — and for **Sparta** I built the complete theme from scratch, and took ownership of the frontend for the ecosystem's five stores — New Balance, Sparta, Head, Speedo and Trek — on a shared codebase: for Head, Speedo and Trek I worked on the theme inherited from the previous agency, adapting it to the site's new infrastructure and rolling out the shared improvements.
- Designed the New Balance Chile interface in **Figma** and contributed to Sparta's design, covering the cycle from client definition to production release.
- Built the projects' **UI kits** in Figma — buttons, inputs, selects, cards, typography, palette and spacing — used as the single source of truth between design and development.

Sites built from scratch: [newbalance.cl](#) · [sparta.cl](#)

Pago TIC

Jun 2020 – Jun 2021 · 1 year

UI Designer and Frontend Developer

Payments fintech.

- Built the company's interface **design system**. Designed the payments platform's checkout, plus visual improvements to its back-office and front-office screens.
- Designed and coded campaign landing pages, forms and banners, taking those pieces to HTML and CSS myself, and coded the mailings.
- Produced the graphic content for the company's sites and payment platforms, including advertising and campaign assets.

Inmental Interactive

Nov 2016 – Jun 2020 · 3 years 8 months

UI Designer and 3D Modeler

BTL advertising agency. Brand activations at events, shopping malls and trade shows.

- Designed **UNICEF**'s fundraising and awareness site with a mobile-first approach: a simple, transparent donation flow with preset amounts and the option of recurring donations. I also designed a downloadable, printable activity book given to donors as a gift.
- Designed mobile applications and, for **Multishan** (Spain), the interface of a fast-food self-ordering terminal and of a virtual exhibitions platform.
- Designed the interfaces of the games brands used to capture user databases at events and malls, on touch screens, augmented and virtual reality.

Clients: Mercado Libre · UNICEF · Multishan (Spain) · Colgate · Puma · Sancor · Nutrilon, among others

Greenzap Equipo Creativo

Feb 2014 – Nov 2016 · 2 years 10 months

Graphic Designer

Graphic design studio. Retail and consumer clients.

- Designed brand identity, brochures and print collateral for retail and consumer brands, as well as advertising assets including television commercials.
