PROFILE

Interface designer with twelve years in digital design, specialised in e-commerce and web product for leading retail brands across Latin America. BA in Graphic Design and Visual Communication.

I design in Figma and build what I design myself. That lets me work with the client from the moment a requirement is defined through to production, and deliver interfaces that reach the browser exactly as they were intended.

Adobe Certified Expert — Adobe Commerce Front End Developer.

SKILLS

Design	Web and e-commerce interface design, UX, design systems and UI kits, style guides, responsive design, brand identity, editorial and advertising design
Tools	Figma, Photoshop, Illustrator, After Effects, 3D modelling and printing
Implementation	HTML5, CSS3, LESS, JavaScript, Magento 2 / Adobe Commerce, theming systems, performance optimization, cross-browser and cross-device compatibility
Other	Git, GitLab, Jira, Claude Code (custom agents and skills)
Languages	Spanish native · English B2, upper intermediate: conversation, technical documentation and written communication

EXPERIENCE

Improntus

Jul 2021 – Aug 2026 · 5 years

UI Designer and Frontend Developer

Multinational e-commerce development agency.

- Designed the e-commerce interfaces and flows of the agency's projects in **Figma**, covering the full cycle from client definition to production release.
- Designed the **New Balance Chile** interface — the brand's official store in the country — and contributed to **Sparta**'s design, and built both sites from scratch: from Figma to production.
- Built the projects' **UI kits** — buttons, inputs, selects, cards, typography, palette and spacing — used as the single source of truth between design and development.
- Built the frontend of **more than 20 e-commerce stores** for leading retail brands in Argentina, Brazil, Chile, Peru, Mexico and Colombia — Kosiuko, Bensimon, Vitamina, Uma, Sole and Granado, among others — which lets me design knowing what is buildable and at what cost.
- Took ownership of the frontend for the five stores of the **Sparta** ecosystem (Chile) — New Balance, Sparta, Head, Speedo and Trek — on a shared codebase: for Head, Speedo and Trek I worked on the theme inherited from the previous agency.
- Created the agency's own base theme to cut markup time across the team, and led that project with a team of three frontend developers.

Sites designed and built from scratch: newbalance.cl · sparta.cl

Pago TIC

Jun 2020 – Jun 2021 · 1 year

UI Designer and Frontend Developer

Payments fintech.

- Built the company's interface **design system**. Designed the payments platform's checkout, plus visual improvements to its back-office and front-office screens.
- Designed and coded the campaign landing pages, forms and banners, taking those pieces to HTML and CSS myself.
- Produced the graphic content for the company's sites and payment platforms, including advertising and campaign assets.

Inmental Interactive

Nov 2016 – Jun 2020 · 3 years 8 months

UI Designer and 3D Modeler

BTL advertising agency. Brand activations at events, shopping malls and trade shows.

- Designed **UNICEF**'s fundraising and awareness site with a mobile-first approach: a simple, transparent donation flow with preset amounts and the option of recurring donations. I also designed a downloadable, printable activity book given to donors as a gift.
- Designed for **Multishan** (Spain) a navigable virtual exhibitions platform, built during the pandemic to replace in-person events: rooms explored through interactive hotspots, holding each brand's stand. For the same client I also designed the interface of a fast-food self-ordering terminal.
- Designed mobile applications for clients across different industries, including one for a pharmaceutical lab with medication reminders and diet recommendations.
- Designed the interfaces of the interactive games brands used to capture user databases at events and shopping malls, built on touch screens, augmented reality and virtual reality.
- 3D-modelled the stands and displays for the activations, and designed the graphics for each event.

Clients: Mercado Libre · Multishan (Spain) · UNICEF · Colgate · Hisense · Puma · Sedal · Nutrilon · Sancor · Whiskas

Greenzap Equipo Creativo

Feb 2014 – Nov 2016 · 2 years 10 months

Graphic Designer

Graphic design studio. Retail and consumer clients.

- Designed brand identity — logos and brand guidelines — along with brochures and print collateral for furniture and home appliance retailers.
- Produced advertising assets, including **television commercials**.
